Mogesh Umapathi

Full Stack Developer · PHP · Laravel · React JS · 4 Years Experience

Email: mogesh13@gmail.com | Phone: +91 82705 18820 | Portfolio

Professional Summary

Full Stack Developer and Technical Lead with **4 years** of hands-on experience building production **ERP, CRM, and SaaS web applications** using **Laravel (PHP), React JS, MySQL, and REST APIs**. Owns the full software development lifecycle — RESTful API architecture, MySQL schema design, third-party API integrations, and React JS admin dashboards. Introduced an Event Bus architecture that reduced Redux boilerplate by **30%**, manages **CI/CD pipelines with Jenkins** for 6+ live applications, and leads and mentors **a team of 4 junior developers** with code reviews cutting pull-request rework by **40%**. Open to relocate immediately.

Technical Skills

Backend	Laravel, PHP (OOP), RESTful API Design, Eloquent ORM, MVC Architecture, Service Layer Design, JWT Authentication, Webhook Integration
Frontend	React JS, JavaScript (ES6+), Redux, React Hooks, Event Bus Pattern, HTML5, CSS3, Bootstrap 5, Responsive UI
Database	MySQL, Database Schema Design, Query Optimisation, Indexing, Relational Database Management
Integrations	Ozonetel (CTI), Twilio (WhatsApp), SendGrid (Email), QuickBooks (Invoicing), AskEva, Buoy Insurance API
Mobile & CMS	Flutter, Dart, Android Development, WordPress (Custom Themes & Plugins), Joomla
DevOps & Tools	Git, GitHub, Jenkins (CI/CD), Agile (Scrum), Sprint Planning, cPanel Deployment, SSL Configuration, Code Review
Soft Skills	Technical Mentoring, Team Lead, Architecture Decision-Making, Cross-functional Collaboration

Professional Experience

Senior Full Stack Developer — **June 2022 – Present**

Webtrendz Technologies India Private Limited — *Tiruvannamalai, Tamil Nadu* (4 years)

- Designed and delivered **4+ production ERP and CRM web applications from scratch** using Laravel — owning RESTful API design, business logic, Eloquent ORM, and MySQL database schema across **10+ relational modules** per project.
- Introduced an **Event Bus architecture** in React JS to replace Redux for cross-component state management, reducing boilerplate code by **30%**; adopted as the standard pattern across all subsequent full stack frontends.
- Led and mentored **a team of 4 junior full stack developers** in Laravel MVC, Git branching workflows, and React JS component patterns; conducted **structured code reviews** to enforce coding standards — reducing average pull-request rework by **40%** and shortening sprint delivery cycles within 3 months.
- Integrated **6 third-party APIs** across live client systems: Ozonetel (VoIP telephony), Twilio (WhatsApp messaging), SendGrid (transactional email), QuickBooks (invoicing automation), AskEva (WhatsApp notifications), and Buoy Insurance API.
- Managed **CI/CD pipelines using Jenkins** for automated deployment of **6+ production applications**; administered cPanel hosting, domain DNS configuration, and SSL certificate setup and renewal.

Key Projects

Real Estate & Property Management CRM *(Laravel, React JS, MySQL, Ozonetel, Twilio, SendGrid)* — [Live]

- Built a full-featured real estate CRM for lead management, property listings, and customer communication; developed the React JS admin dashboard, Laravel website, and **separate REST APIs for two mobile apps**.
- Integrated **Ozonetel** for agent telephony, **Twilio** for WhatsApp messaging, and **SendGrid** for automated transactional email notifications.

Industrial Job Management ERP *(Laravel, React JS, QuickBooks API)* — [Live]

- Delivered an ERP system for a metal manufacturing firm to manage **job quotes and production workflow cards**; built the React JS admin dashboard and Laravel API backend.
- Integrated **QuickBooks** for fully automated invoice generation, reducing manual billing effort.

Garment Order & Production Tracking CRM *(Laravel, React JS, AskEva)* — [Live]

- Developed a CRM for a garment business to **track customer orders, job stages, and invoices**; integrated **AskEva** for real-time WhatsApp-based customer notifications.
- Designed and deployed a **proforma and billing module** — enabling structured invoice generation across order stages, with automated calculation of totals, taxes, and payment tracking.

Boat Rental Booking Marketplace *(Laravel, Buoy Insurance API)* — [Live]

- Built a boat rental marketplace where operators manage listings and end-to-end bookings; integrated **Buoy Insurance API** directly into the booking flow for on-demand rental coverage.

Additional Contributions

- Developed **custom WordPress themes and plugins** for 5+ client websites, delivering tailored PHP solutions aligned to branding and functional requirements.
- Built and shipped features for an **Android mobile app using Flutter and Dart**, integrating REST APIs across multiple screens and navigation flows.
- Performed **Joomla CMS version upgrades** for multiple client sites, validating backward compatibility of custom components post-migration with **zero data loss**.

Education

Bachelor of Science (B.Sc.) in Mathematics — **June 2017 – May 2020**
Kalaignar Karunanidhi Government Arts and Science College — *Thiruvalluvar University, Tamil Nadu* *Percentage: 69%*

Higher Secondary Certificate (HSC) — Class XII — **March 2017**
Danish Mission HR Secondary School, Tiruvannamalai — *Tamil Nadu State Board* *991/1200 (82.58%)*

Secondary School Leaving Certificate (SSLC) — Class X — **March 2015**
Danish Mission HR Secondary School, Tiruvannamalai — *Tamil Nadu State Board* *428/500 (85.6%)*
